

PlateTronic Ultima Installed Above Ground May 2003

We have been using a PlateTronic Ultima since May 2003. Every vehicle entering the workshop is automatically checked for brakes and alignment. This has become a valuable tool for generating sell-ups and increasing profits.

The PlateTronic is used by all workshop staff and the information received, in its vast range of application, contributes greatly to accurate diagnosis and repairs on a daily basis.

‘Personally, I find it hard to understand why every dealership doesn’t have one’
