

PlateTronic Ultima Installed Above Ground July 2004

We sell a Safe-T-Stop test to the customer while they are in the valet reception area for \$20. The test is presented in a Safe-T-Stop presentation folder making it simple for them to understand.

There are also other advantages we have found since installing the Safe-T-Stop. Our technicians no longer leave the premises to do a brake test for registration pink and blue slips, which is great in the wet weather and a bonus for our OH&S compliance.

We utilise the weighbridge function for our new car department registrations, this alone saves more than 30 minutes per new car that needs to be weighed. Every new car having a pre-delivery inspection is also put over the Safe-T-Stop for a brake and wheel alignment test.

We know that every vehicle delivered from Nowra Toyota has had a proper brake test and wheel alignment check and we have a printed record to keep with the vehicle files. Safe-T-Stop has definitely proven to be a winner in our service department.
