

PlateTronic Ultima Installed Above Ground September 2005

"The system is great! It is used every day for rego checks which means the mechanics don't have to go on the road with the customer's car.

Our customers really appreciate this and most of them are happy to pay a fee to have the test included in their regular service.

They are pleased that we pick up any brake problems and especially any wheel alignment issues that need to be addressed immediately. We highly recommend Safe-T-Stop"
