

PlateTronic Ultima

Installed: March 2006

The Safe-T-Stop machine is already **making about \$150 per day** and it has only been installed for two weeks.

We are using it to make minor wheel alignment adjustments and it is really finding out just how many vehicles have brakes that are not working efficiently on the rear as they should be. It is also highlighting just how many vehicles do have brake problems.

“This is one piece of equipment that Drysdale Motors cannot be without ever again.”
