

## PlateTronic PitStop 'WS' Installed Above Ground May 2006

Following the success of our installation, we recommended that our Lithgow branch also install the Safe-T-Stop test system.

Now both of our branches are enjoying the many benefits that Safe-T-Stop has brought to our business.

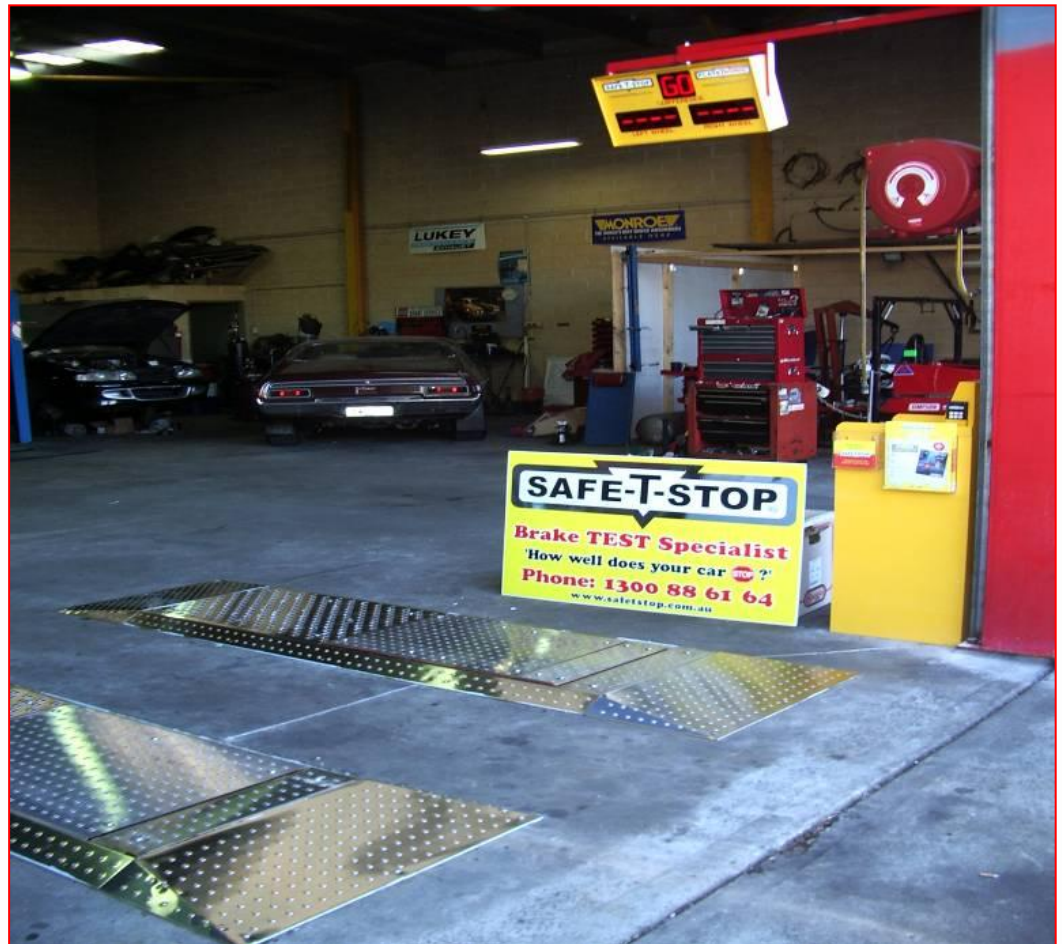

Our customers have received this new technology well and are happy that we are not driving their cars on the road for a brake test.

This system has increased our workshop productivity and at the same time has brought a new level of safety to our brake testing procedures.
